1.0 Purpose

Environmental Works, Inc. (EWI), on behalf of the Carl Junction R-1 School District (Carl Junction), has prepared this Lead in Drinking Water Sampling and Testing (LDWST) Plan in response to the Missouri Revised Statutes of Missouri (RSMo) Chapter 160 Section 077 (160.077). This LDWST Plan includes procedures for inventorying and sampling outlets used for drinking water and water dispensed for cooking and cleaning of eating and cooking utensils in the Carl Junction R-1 school buildings.

This Plan has been prepared to meet the requirements of the RSMo 160.077, the Environmental Protection Agencies (EPA) 3T's for Reducing Lead in Drinking Water and the EPA Safe Drinking Water Act (SDWA). The Carl Junction School District has distributed this LDWST Plan to the public through the District website (www.cjr1.org). General information on the health effects of lead contamination and additional informational resources for employees and parents of children at each school will be provided upon request.

1.1 Regulatory Schedule Requirements (RSMo 160.077(4))

In accordance with RSMo 160.077, on or before January 1, 2024, each school will:

- Conduct an inventory of all drinking water outlets and all outlets that are used for dispensing water for consumption, cooking and cleaning of cooking and eating utensils;
- Develop a Plan for testing each outlet inventoried;
- Provide the Plan to the public; and
- Upon request, provide general information on the health effects of lead contamination and additional informational resources for employees and parents of children at each school.

Before August 1, 2024, or on the first day students will be present in the building, whichever is later, each school will:

- Complete sampling in accordance with RSMo 160.077
- Make all testing results and any lead remediation plans available on the school's website within two weeks of receiving final analytical test results;
- Remove and replace any drinking water coolers or drinking water outlets that the EPA has determined are not lead-free under the federal Lead Contamination Control Act of 1988.

2.0 School District Description and Contact Information

2.1 School District Information

School District: Carl Junction R-1 Schools

School Type: Public

Address: 206 South Roney
Carl Junction, Jasper County, Missouri 64834

Phone: (417) 649-7034 (O) and (417) 649-6566 (F)

Email: dwilkins@cjr1.org

District Contact: David Pyle, Ed.D.
Assistant Superintendent for Operations
Office: (417) 649-7026, Fax: (417) 649-6594
dpyle@cjr1.org

2.2 Buildings

The following table summarizes the schools covered in this LDWST Plan.

Schools	Level	Grade	Address
Carl Junction Primary K-1	Early Childhood and Elementary	Pre-K - 1st	206 S Roney Carl Junction, MO 64834-9402
Carl Junction Primary 2 nd & 3 rd	Elementary	2nd-3rd	206 S Roney Carl Junction, MO 64834-9402
Carl Junction Intermediate	Intermediate	4th – 6th	401 West Wells Street Carl Junction, MO 64834-9402
Clem Prettyman Satellite School	Primary	4th – 12th	1999 Snowberry Lane Joplin, Missouri 64834
Carl Junction Junior High	Junior High	7th – 8th	306 Keeney Drive Carl Junction, MO 64834-9402
Carl Junction High School	High School	9th-12th	806 Walnut Street Carl Junction, MO 64834-9402
Carl Junction ISC/CJU	Varies	Varies	206 S Roney Carl Junction, MO 64834-9402

3.0 Inventory

Carl Junction completed a building and outlet questionnaire and EWI completed a site visit to gather information such as:

- Date of building construction.
- Year and location of plumbing repairs
- Location of where water enters the building and flow.
- Identification of any known lead lines or plumbing components.
- Location of water pipes and piping material.
- Location of any tanks in the plumbing system.
- Identification of all faucets and fixtures used for drinking water and cooking.
- Identification of filters, aerators, signs of corrosion or banned water cooler tanks.

3.2 Outlet Identification and Prioritization

Drinking water and cooking outlets were identified from the questionnaire and site-visit in accordance with the Missouri RMOs 160.077.2 drinking water outlet definition, which includes, but may not be limited to:

- a) A water fountain, faucet, or tap that is used or potentially used for drinking or food preparation;
and
- b) Ice-making and hot drink machines.

Building diagrams are attached in **Appendix A**, detailed information on each building can be found in **Appendix B** and the outlets identified in the inventory is outlined in **Appendix C**.

4.0 Sampling and Testing

4.1 Initial Sampling and Testing

The outlet inventory and prioritization schedule included in this plan will be used to conduct sampling for the Carl Junction Primary 2nd and 3rd building. Samples will be collected using proper sampling procedures. The sampler will utilize laboratory prepared 250-milliliter (mL) unpreserved plastic containers to collect outlet water for analysis of lead by Method 200.8. Samples will be labeled, managed under a Chain of Custody, and sent to a certified laboratory for analysis. EWI personnel will collect samples from each identified outlet based on the following criteria:

First Draw Sampling

First draw samples will be immediately collected from the outlet from the first water after the outlet is turned on. Samples will be collected after a stagnation period of at least 8 hours but no greater than 18 hours.

Flush Sampling

Follow-up flush samples will be collected from at least 25% of inventoried drinking water outlets.

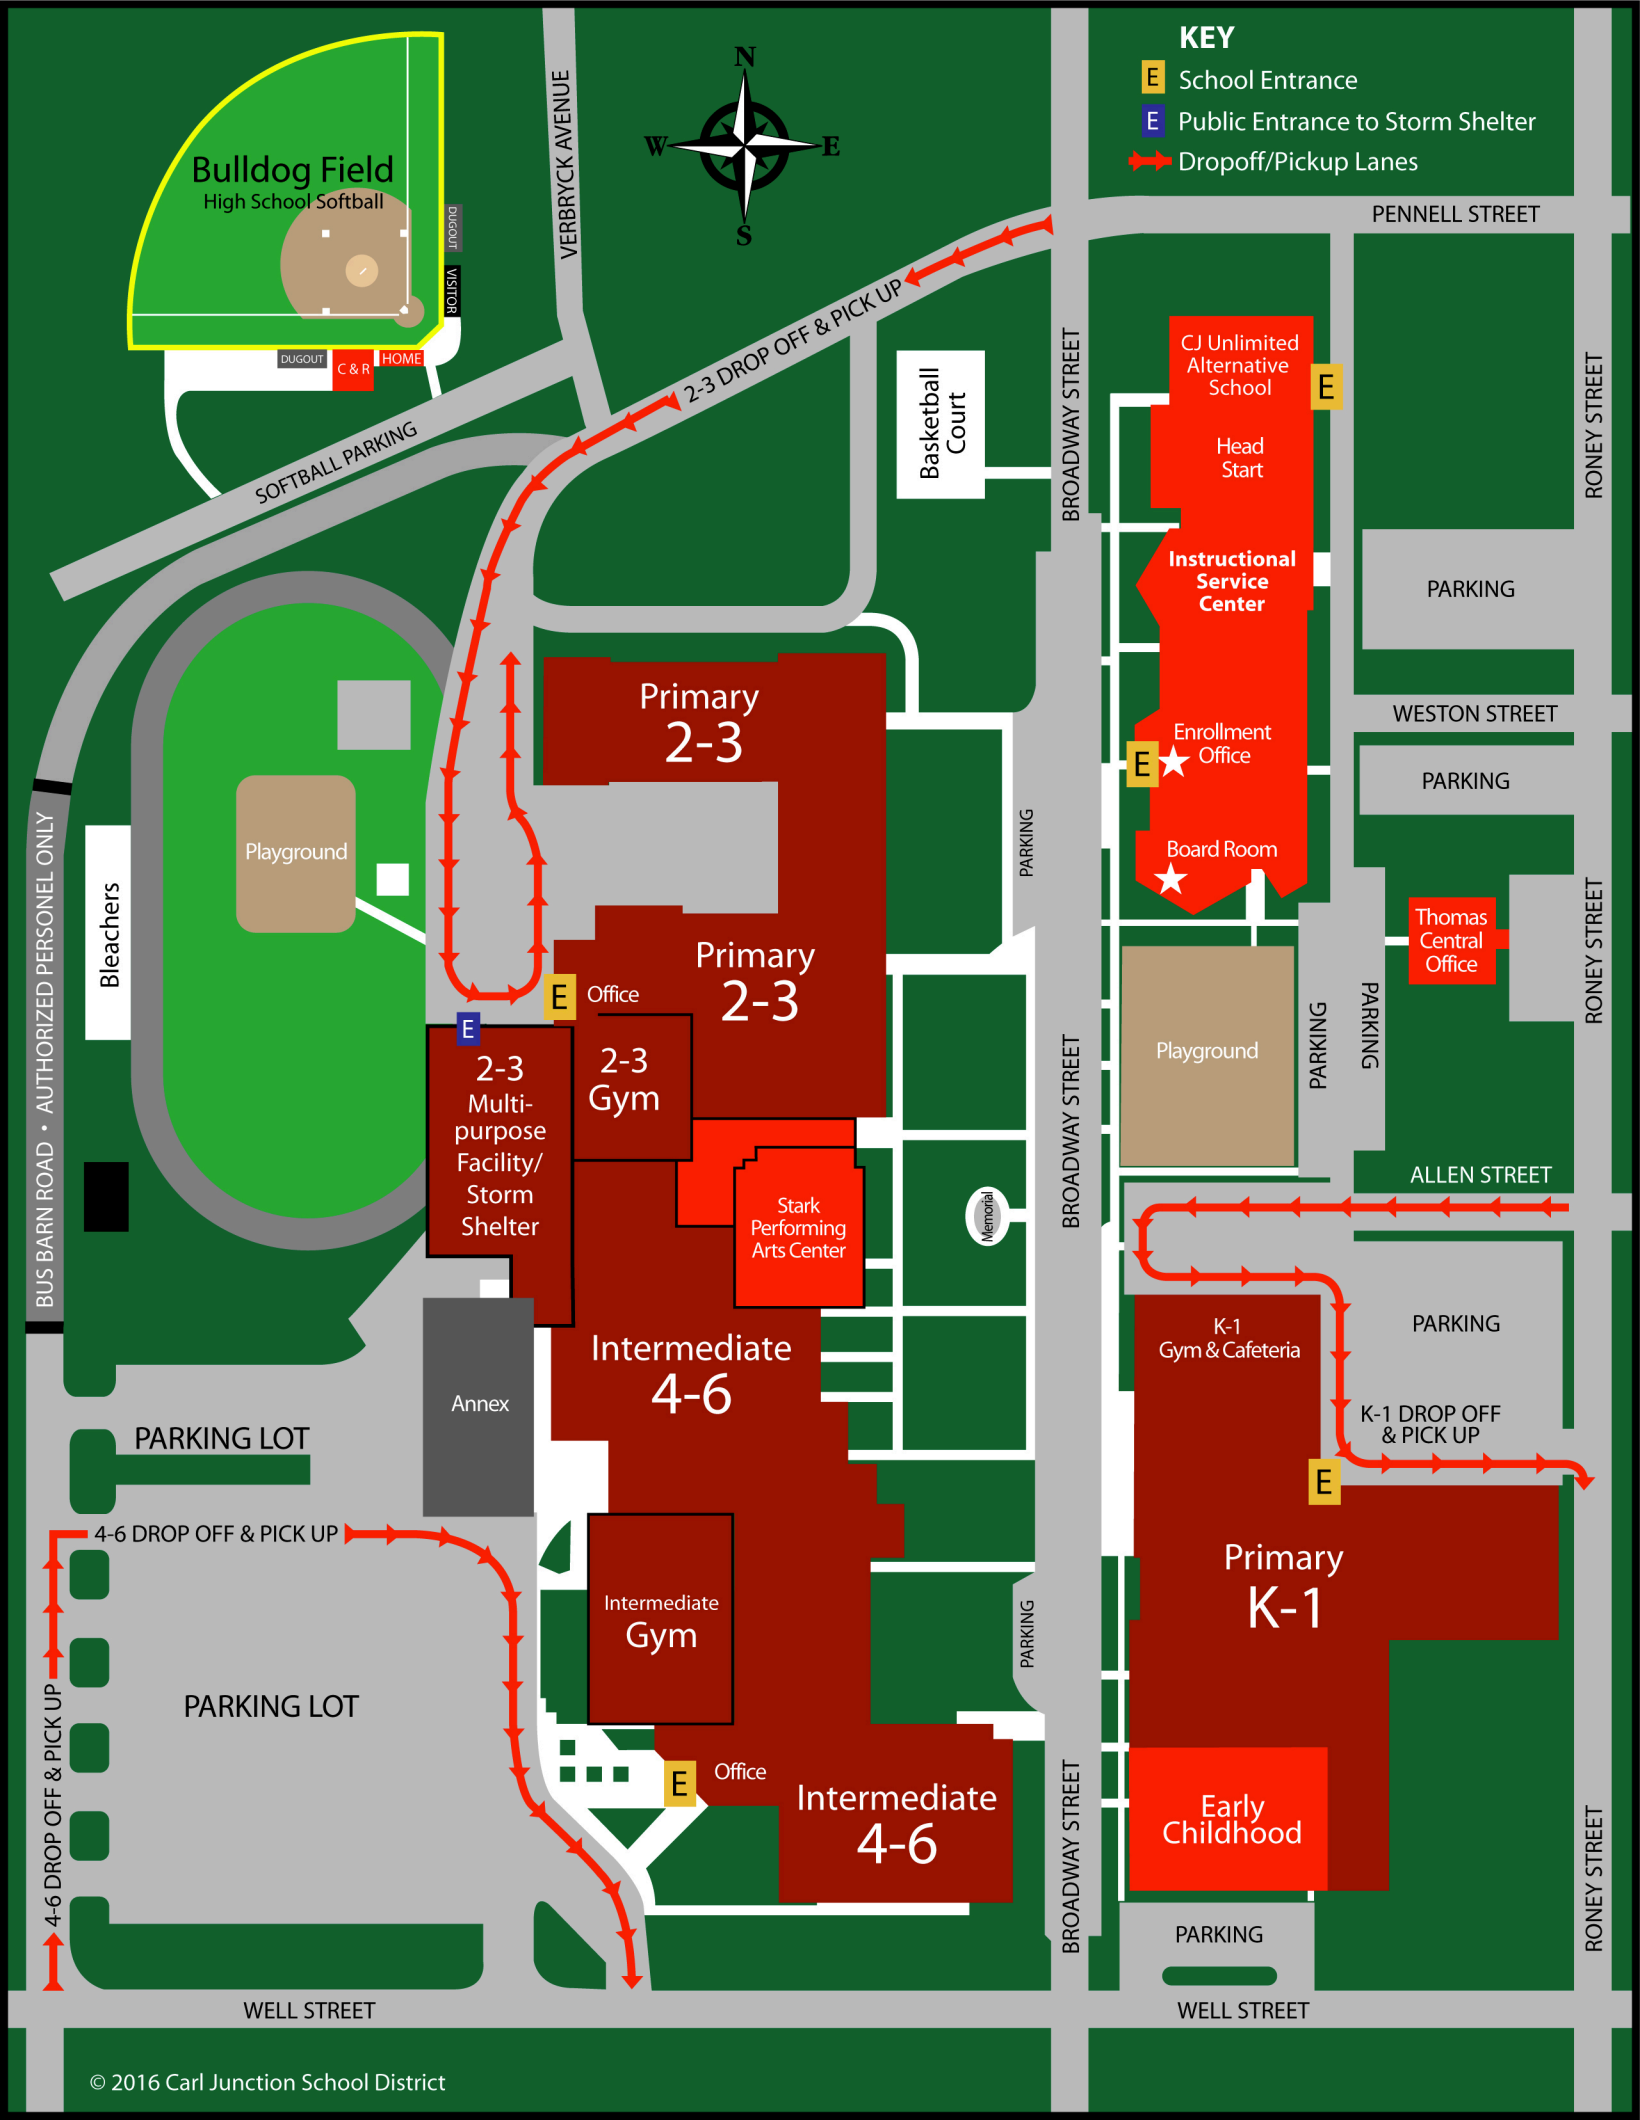

All results will be summarized in a final report, submitted to the Missouri Department of Health and Senior Services, and published on the school district website.

4.2 Subsequent Sampling and Testing

If initial testing finds lead above 5 ppb, the school district will implement remedial measures then test and sample 25% of remediated drinking water outlets by first draw and follow-up flush sampling annually.

If initial testing does not find a drinking water source with a lead concentration above 5 ppb, the school district will complete testing and sampling every five years.
